If directions for use not followed correctly and applied too hot this may cause burns in which case flush with or immerse in cold water. Seek medical attention for burns.	
Inhalation:	If respiratory symptoms develop whilst using molten material remove patient from area of exposure into fresh air. If symptoms persist, seek medical advice.

5.3. Hazards from combustion products:	During a fire irritating and toxic gases (carbon dioxide, carbon monoxide etc.) may be produced by combustion or thermal decomposition. Wear a breathing apparatus	
5.4. Protective equipment for firefighters:	Move exposed containers from fire areas if possible. Firefighters	

	should wear full protective clothing including self contained breathing apparatus.
